RE: Lindsay Lite II Site, 310 East Illinois Street, Chicago, Illinois -- STS Project No.  
27313-ZH

Dear Ms. Simon:

This letter is to confirm our recent conversation regarding the preparation of status reports on the above-referenced site.

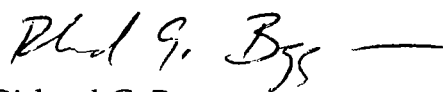

Paragraph 14 of the Administrative Order of Consent (AOC) dated January 17, 1994, requires a monthly status report be prepared for this project. With the last status report filed in October 1995, the submittal of the final revisions to the Site Characterization report for the above-referenced site and the submittal of an affidavit as required by the AOC, it is our opinion that all appropriate documents necessary for compliance with the work plan have been completed. In accordance with our recent discussions, the obligation to submit status reports has been waived and suspended until either further notice and request for resumption of status reports or notice is received from the USEPA that all appropriate work on this site has been completed in accordance with the Administrative Order of Consent.

Please advise us if any aspect of this letter and understanding is contrary to your recollection of our recent discussions.

We appreciate the opportunity to work with you on this project. Please contact us with any questions you have regarding this matter.

Respectfully,

STS CONSULTANTS, LTD.
